STRING WORKSHEET

- To order:
- Please list **strings** and **note names** from # 1 (shortest/highest) on your harp to longest/lowest.
 - Any **wrapped** string (nylon/nylon or steel/fiber/copper, etc.) needs a **vibrating length**. Please measure vibrating length **from soundboard to bridge pin** in inches to the nearest 1/4 inch.
 - Please list **diameters** and/or **wrap specifications**, if known (e.g., nylon/nylon -- .050/.010 = core/wrap, for steel strings, steel/fiber/copper = .018/5/.012 or diameter .054). Send a sample of the string(s), if possible.
